Earth Bound Bags

Naturally Made. Thoughtfully Chosen.

Sustainable bags designed for businesses, brands and everyday moments.

The Earthbound Bag range brings together natural materials, timeless design and practical functionality. From jute and juco to cotton, canvas and kraft paper, every bag is selected with a focus on durability, reusability and a more considered approach to everyday packaging.

Designed for modern businesses and conscious consumers, these are bags made to be used, reused and remembered.

NATURAL MATERIALS
Jute, cotton, canvas & more. Selected for their natural character and versatility.

MADE TO REUSE
Practical bags designed to become part of everyday life rather than single-use packaging.

CRAFTED WITH CARE
Earthbound Bags highlights skilled artisans and traditional craftsmanship across its collection.

READY TO BRAND
A natural canvas for logos, campaigns, events, gifting and retail branding. Earthbound Bagsspeci ically offers custom branding for businesses and events.

Designed for modern businesses and conscious consumers.

Our mission is to provide sustainable alternatives without compromising on quality, style or functionality.

DID YOU KNOW?
Kraft comes from strength.
The word kraft comes from the German word for “strength” — fitting for a paper known for its strong, long fibres.

Oak
Brown Paper Bag With Handles
Colour: Brown
Material: Virgin Kraft Brown, 90gsm
Size: 280 x 370 x 145 mm

Oak
Brown Paper Bag Without Handles
Colour: Brown
Material: Virgin Kraft Brown, 90gsm
Size: 280 x 370 x 145 mm

DID YOU KNOW?
White can still be natural.
Baywhite gives you a crisp, premium-looking white finish without losing the character and strength of kraft paper.

Willow
White Paper Bag With Handles
Colour: White
Material: Baywhite, 125gsm
Size: 280 x 370 x 145 mm

Willow
White Paper Bag Without Handles
Colour: White
Material: Baywhite, 125gsm
Size: 280 x 370 x 145 mm

BRANDING METHODS

SCREEN PRINT

A stencil is created on a fine mesh screen, blocking off certain areas.
Ink is then pushed through the open parts of the mesh and onto the material, transferring your design with bold, solid colour.

DTF

Your design is printed onto a special film, coated with adhesive powder, and then heat-pressed onto the product. This creates a bright, durable, full colour print that works especially well on fabrics.
